Test Date	23/08/2023
Test Time	2:00 PM - 4:30 PM
Subject	Engineer Trainee Electrical

Section : Question on Subject/Discipline

Q.1 CISC is the acronym used for:

- Ans
- ✓ 1. Complex Instruction Set Computing.
 - ✗ 2. Complementary Instruction Set Computing.
 - ✗ 3. Complex Instruction Set Combining.
 - ✗ 4. Complementary Instruction Set Combining.

Q.4 Consider the sinusoidal signal $x(t) = \cos\left(\frac{\omega_s}{2}t + \phi\right)$. Suppose this signal is sampled at ω_s frequency. If this impulse-sampled signal is applied as the input to an ideal lowpass filter with cutoff frequency $\omega_s/2$, the resulting output is:

- Ans
- ✗ 1. $x_r(t) = (\sin \phi) \sin\left(\frac{\omega_s}{2}t\right)$
 - ✗ 2. $x_r(t) = (\cos \phi) \sin\left(\frac{\omega_s}{2}t\right)$
 - ✗ 3. $x_r(t) = (\sin \phi) \cos\left(\frac{\omega_s}{2}t\right)$
 - ✓ 4. $x_r(t) = (\cos \phi) \cos\left(\frac{\omega_s}{2}t\right)$

Q.37

What will be the natural frequency (ω_n) for the above controller?

Ans

✗ 1. $\omega_n = \sqrt{\frac{1}{J K_p}}$

✓ 2. $\omega_n = \sqrt{\frac{K_p}{J}}$

✗ 3. $\omega_n = \sqrt{\frac{J}{K_p}}$

✗ 4. $\omega_n = \sqrt{J K_p}$

- Q.56**
1. A system is said to be completely controllable if it is possible to transfer the system state from any initial state $X(t_0)$ to any desired state $X(t)$ in specified finite time by a control vector $u(t)$.
 2. A system is said to be completely observable, if every state $X(t_0)$ can be completely identified by measurements of the outputs $y(t)$ over the time interval $(0 \leq t \leq \infty)$.

Read the above two statements and select the correct option.

- Ans**
- ✓ 1. Statement 1 is true and Statement 2 is false.
- ✗ 2. Statement 2 is true and Statement 1 is false.
- ✗ 3. Both Statement 1 and Statement 2 are false.
- ✗ 4. Both Statement 1 and Statement 2 are true.

- Q.76
1. Power MOSFETs are majority carrier devices.
 2. Power MOSFETs cause inferior conduction characteristics as the voltage rating is increased above 200 V.

Read the above statements and select the correct option.

- Ans
- ☐ 1. Statement 2 is true and Statement 1 is false.
 - ☒ 2. Both Statement 1 and Statement 2 are true.
 - ☐ 3. Statement 1 is true and Statement 2 is false.
 - ☐ 4. Both Statement 1 and Statement 2 are false.

@technicalgroww

Comprehension:

Read the given passage and answer the questions that follow.

Unlike conventional pigeon races, wherein the finishing points differ, One Loft Races have the same starting and finishing points. Pigeons, typically less than six weeks old, are taken to the special loft to be used for the event before they can fly. The birds then slowly learn to fly and recognise this loft as their home. The training, food, and conditions are the same for all the birds. With the usage of electronic timing systems, the winners of One Loft Races are decided by as little as 100th of a second.

It is a smoggy April morning in Signature Bridge, Delhi. Three men unshackle 26 trained homing pigeons kept in two rectangular cages on an empty ground. Two more men hold a banner that says Karnataka Homing Pigeon Federation in English and Kannada. As both the cages are simultaneously opened, the birds slowly walk out, flap their wings and take off.

From this starting point, where they have never been before, they need to find their way back to their respective lofts, over 1,500 kilometres away. Once they reach their destinations, the distance and velocity of the birds are measured to determine the winner of the race.

Among the participants is Red Rocket, a three-year-old grey-headed pigeon with a white-and-brown plume. Like his competitors, he, too, bears a red seal on his wings and two rubber bands on his legs. After nine days of flight, on April 24, 2022, the pigeon reaches his loft at Shanker V's residence in Hennur Gardens, Bengaluru. Shanker, a pigeon fancier, immediately removes the bands from his bird's legs to reveal an identification number. He clicks a photo and sends it to the organisers, who verify the numbers, measure the distance covered and the velocity of its flight.

Red Rocket, they announce, has flown 1,741 kilometres at 251 metres per minute, making him the winner. The pigeon had never been this far from his nest. Yet, he does what he always has: find his way back home.

This extraordinary capability is a result of magnetoreception, wherein animals and birds orient and navigate using the earth's magnetic field. At one point, humans selectively bred pigeons for their extraordinary ability. This led to the creation of a breed of homing pigeons, used for communication and later racing.

SubQuestion No : 41

Q.41 Select the option that completes the statement correctly.

The race is called One Loft Race because all the pigeons are:

- Ans
- ☐ 1. tracked by using an electronic timing device
 - ☐ 2. given the same training and food
 - ☐ 3. less than six weeks old
 - ☒ 4. raised and trained in the same loft

Comprehension:

Read the given passage and answer the questions that follow.

At an exhibition, one of the several taking place in Kolkata to mark 75 years of India's Independence, the organisers placed a bundle of postcards and a handful of pens on a large table and asked visitors to write down their family memories of that defining moment in history. What has emerged is a still-growing collection of heart-warming as well as heart-wrenching stories that may not be found in history books but are still a valuable part of history. "My late grandfather's account of 15th August is rather funny," wrote Gangotri Chattopadhyay from Singur in her message. "A bunch of village kids with no money or resources stole a bunch of gamchha (thin cotton towel) and hoisted them on a bunch of sticks and ran through the rice fields, overjoyed about a free India. It is the spirit that counts." Ms. Chattopadhyay's is among the nearly 600 postcards that the DAG, or Delhi Art Gallery, has collected so far from its ongoing exhibition, 'March to Freedom', being held at the Indian Museum. The exhibition, showcasing 200 years of art, began on July 23 and will end on September 18. In one gallery, a poster asks: "Do you know what your parents were doing on August 15, 1947? What are your family memories or experiences from the time of India's independence?" The response has been unexpected, what with fresh blank postcards and pens at hand. Diyaa's family memories go back to a painful period before Independence - the Bengal famine of 1943 and the Second World War - when her paternal grandmother, a little girl at the time, remembered the family eating rice with salt because everything else was unaffordable. The grandmother would narrate such stories "in the flicker of candlelight back when power cuts plagued Bengal in the early 2000s". At first, I wondered whether people would respond thoughtfully to the prompt but I was pleasantly surprised to see how much care people had taken to record their family stories. Like we had hoped, what emerges is the story of ordinary people who don't find a place in our history books but who grappled with the idea of becoming citizens of a new nation in myriad ways.

SubQuestion No : 46

Q.46 At first, I wondered whether people would respond thoughtfully to the prompt....

What does 'prompt' in this sentence refer to?

- Ans
- ☒ 1. Power cuts
 - ☒ 2. Recording family histories
 - ☒ 3. Questions on the poster
 - ☒ 4. Ordinary people

It is the spirit that counts." Ms. Chattopadhyay's is among the nearly 600 postcards that the DAG, or Delhi Art Gallery, has collected so far from its ongoing exhibition, 'March to Freedom', being held at the Indian Museum. The exhibition, showcasing 200 years of art, began on July 23 and will end on September 18. In one gallery, a poster asks: "Do you know what your parents were doing on August 15, 1947? What are your family memories or experiences from the time of India's independence?" The response has been unexpected, what with fresh blank postcards and pens at hand. Diya's family memories go back to a painful period before Independence - the Bengal famine of 1943 and the Second World War - when her paternal grandmother, a little girl at the time, remembered the family eating rice with salt because everything else was unaffordable. The grandmother would narrate such stories "in the flicker of candlelight back when power cuts plagued Bengal in the early 2000s". At first, I wondered whether people would respond thoughtfully to the prompt but I was pleasantly surprised to see how much care people had taken to record their family stories. Like we had hoped, what emerges is the story of ordinary people who don't find a place in our history books but who grappled with the idea of becoming citizens of a new nation in myriad ways.

SubQuestion No : 50

Q.50 Select the statement that is NOT true according to the passage.

- Ans**
- ☒ 1. The stories recounted are not part of any history books.
 - ☒ 2. People wrote stories that were both touching and agonising.
 - ☒ 3. People only wrote stories about famine and poverty.
 - ☒ 4. 'March to freedom' displayed 200 hundred years of art.
